## NEWSLETTER

As with every month, we are cover what's new with **Misfit Studios**, month's new products, and details on our January 2015 discount promotion. Read on for details!

### WHAT'S GOING ON WITH MISFIT STUDIOS

December saw **Misfit Studios** closing on a slower note than November, but still well considering I'm now working on the company full-time. The demands of the holiday season, along with the fact that people slow down on their digital RPG buying so they can spend money on gifts, didn't stop us from seeing our most profitable year closing since we began!

Looking forward into the New Year, I am excited to get **Metahuman Martial Arts 3e** out the door -- the manuscript is shaping up quite nicely. Once that's done, there are a number of other projects that top my list of most exciting things in store, so I look forward to getting to work on them.

### MISFIT STUDIOS IN PRINT

## MONSTER BRIEF: DEADLY PLANTS

Stock #: MI7032

In this product you will find four plant creatures that can surprise your player characters and give them a run for their money. These new monster entries will provide Gamemasters with new foes to spring out of the garden when the heroes least expect it.

The deadly Abakar blossoms are moving plants, created long ago by an insane alchemist. And, oh yes ... they spit acid.

A dragonmouth plant is an example of man-eating greenery that can grow to the size of a tree. Their thorny bite can paralyze long enough for the plant to crush its prey to death.

Rotted tree men are dark versions of the more benign forest wardens. Tainted, they seek to destroy life so that it resembles the rot within their wooden hearts. They spread their corrupting influence to their surroundings.

Somehow infused with death, trees of the dead can sense corpses around them, which they then bring back to life to spread out nearby life.
