### WHAT'S GOING ON WITH MISFIT STUDIOS

*Darwin's World, Nuclear Edition* finished its second month of being released and continues to sell well. Plans to publish more content is in the works, including small, periodic releases and larger books (the first of which will be a revamped *Metal Gods*.) There are currently two products already in approvals.

In addition to converting the previous d20 Modern version of *Darwin's World* over to the **Savage Worlds Nuclear Edition**, I'm also pitching entirely new, original ideas to **RPGObjects** to see what they think. Fingers crossed!

Aside from that, we released another Monster Mods for *Savage Worlds* and yet more great stock art from the usual suspects.

## MONSTER BRIEF: YET MORE MONSTER MODS

Stock #: MIS97110

Get more mileage out of your Savage Worlds monsters with Monster Brief: More Monster Mods.

Monster mods allow Gamemasters to quickly modify an existing bestiary entry to present a specific type of variation with new and altered abilities. Each mod includes the sort of creatures it is and is not appropriate for, suggested game genres, and mandatory and optional abilities to provide even more customization. A sample modified creature is provided for each mod.

In this product, you will find:

The aquatic/amphibious mod turns the subject into a creature who lives in the water, either part- or full-time. Sample creature: aquatic ogre.

The assassin cyborg mod uses material in the Science Fiction Companion to turn the subject into a half-organic, half-machine killer. Sample creature: cyborg assassin avion.

The blind mod uses material in the Horror Companion to turn the subject into a creature that has evolved to life without sight. Sample creature: blind seducer demon.

The cold elemental mod turns the subject into a creature of frost, ice, or snow. Sample creature: ice dog.
