NEWSLETTER

As with every month, we are cover what's new with **Misfit Studios**, October's new products, and details on our November 2014 discount promotion. Read on for details!

WHAT'S GOING ON WITH MISFIT STUDIOS

It's been an ... interesting month here at **Misfit Studio**. Mid-way through the month, I was "terminated without cause" from my day job so they could hire someone younger and cheaper to do my job, which has left me plenty of time through the rest of October to devote to **Misfit Studios** products.

Also, our **Kickstarter** project, **the Adequate Commoner** finished up on the 24th. It reached its goal of \$2,500 pretty early on, and then kept going through its stretch goals until it reached the final amount of \$6,118 thanks to 163 backers. Now, we move on with fleshing out the content and playtesting.

Busy, busy days ahead.

You have received this newsletter because you have set your **OneBookShelf** account settings to allow emails from publishers. If you do not wish to do so, you must change this setting in your account.

MISFIT STUDIOS' NEW RELEASES -- GAME PRODUCTS

October saw **Misfit Studios** reach a point where we began releasing a stock art image a day about half way through in order to make as much of our partnered artists' work available as possible before Halloween. So, I've broken this section down into game products followed by publisher resources (stock art and more) for your convenience.

MISFITS & MENACES A.E.G.I.S. FOR ICONS

Stock #: MIS6002

Misfits & Menaces A.E.G.I.S. for ICONS details an international corporation that puts on the public face of a benefactor to all humanity, but in truth it works on shadowy government projects and for any criminal organization that can pay its fees. Within this PDF you will find:

- Game statistics for A.E.G.I.S.' insidious, mad scientist CEO.
- An extensive list of current projects the company is undertaking -- both public and secret. This section provides a wealth of ideas to mine for your games.

Think of any major ecommerce website you frequent (including this one.) You will notice they are constantly pitching additional products to you based on similarities to the ones you are looking at on their site. Even on any of the various OneBookShelf websites (RPGNow, Drive-Thru, etc.), you will see products appearing along the sides, and sometimes even the top or bottom of the page you are on. This is all because doing so increases sales.

Internet marketing specialists have long since established that many customers are likely to make additional purchases if they are exposed to them while visiting a webpage with the intention of already buying things. So why isn't your OneBookShelf storefront doing this, as well?

Customize Your own OBS Footer Code to Increase Product Exposure

You'll probably notice that most publishers selling through OneBookShelf do not have customized footers under their primary product descriptions. Misfit Studios, on the other hand, has such a footer displayed for all of its products. These footers alone account for dozens more sales each month -- all without any additional work once the footer is created, aside from keeping it up to date with new product entries.

The OBS Footer Code provided by this product is entirely customizable to include as many products, product categories, or footers as you like! The instructions are incredibly detailed, including colour coding and screen shots to make things easier for you.

Can you afford to miss out on such simple, low hanging sales simply because you haven't made use of all the tools available to you on this ecommerce website?
