WHAT'S GOING ON WITH MISFIT STUDIOS

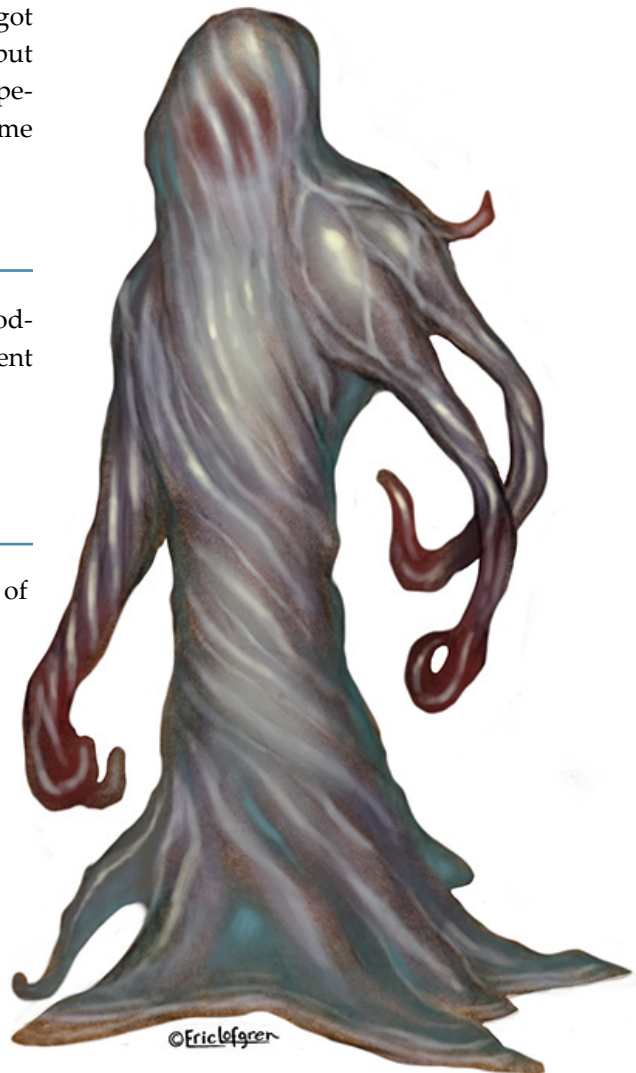

The day job has been very taxing for the past several weeks, so **Misfit Studios** has necessarily been slow. We got some great stock art out and a new **Super Archetype**, but that's it aside from still working on **Darwin's World**. Hopefully, there will be some free time this month to get some new game product out.

This Super-Powered Savage Worlds RPG release brings you The Artificial Intelligence Archetype. This ready-to-go character build provides a foundation for you to develop a hero of your own that exists as nothing more than code travelling the information highways and residing in computers and other digital media. Despite the lack of a physical body, the character has its own thoughts and personality—and may want more of life. Includes A.I. racial package. Gamemasters can also use the archetype as the basis for quickly building NPC heroes or villains off-the-cuff.

Each Super Archetype presents the basic build, plus ideas for some typical roles the character may fill, along with variations you may want to explore.

This product is compatible with material found in the Super Powers Companion (Second Edition)

Both a color and print-friendly version of the product are included.
